

SYNTAX presents BMC Control-M™

The BMC Job Scheduling Software
has been positioned
in the Leaders of
Gartner 2009 Magic Quadrant

IT Workload Automation and Job Scheduling

BMC CONTROL-M™ can provide you with an enterprise wide workload automation solution, enabling you to integrate and manage all your critical business processes from a single point of view.

BMC CONTROL-M has over 2,500 users, many of whom migrated from legacy schedulers. The migration allows them to take advantage of the inherent high scalability and failover capabilities and productivity and quality features such as z/OS application integration, agentless deployment, intelligent alerts, lifecycle management and audit and compliance reporting.
